

# *Your Pharmacy* in the Heart of the Hill

## About the Pharmacy

The Center for Pharmacy Services is a non-profit, community pharmacy operated by Duquesne's Mylan School of Pharmacy that serves both the public and the University community. Staffed by licensed pharmacists, the center helps patients manage their medications and live healthy lifestyles. As a patient at our pharmacy, you can benefit from:

- A \$4 generic drug program
- Free health and wellness screenings, such as blood pressure, cholesterol and blood glucose
- Free prescription delivery
- Medicare/Medicaid and most major insurance accepted

## We Care About Your Health

At The Center for Pharmacy Services, we care about you. That's why we do more than provide your medications at the lowest cost. Our licensed pharmacists will work with you to review and track your medication as well as help you with any issues or questions relating to your medication.

## Free Prescription Delivery

We understand that patients can't always get to the pharmacy to pick up the medications they need to stay healthy. With this in mind, we will make sure you can get your prescription when you need it with our free delivery service, and many can be filled and delivered the same day. We'll also call to remind you when it's time to refill your prescription.

## Your Partner in Leading a Healthy Lifestyle

We can help you lead a healthy lifestyle with free health screenings, immunizations, nutrition counseling and information about making lifestyle modifications. You can also join us the second Monday of each month for Healthy Heart Club meetings.

Conveniently located on **Centre Avenue**, directly across from Hill House and Shop 'n Save.

The pharmacy is open 9 a.m. to 5 p.m. Monday through Friday.
